### a. Dasar Penyusunan Laporan Keuangan Konsolidasian

Kebijakan akuntansi yang diterapkan dalam penyusunan laporan keuangan konsolidasian ini adalah selaras dengan kebijakan akuntansi yang diterapkan dalam penyusunan laporan keuangan konsolidasian Grup tanggal 31 Desember 2022.

Laporan keuangan konsolidasian, kecuali laporan arus kas konsolidasian, telah disusun secara akrual dengan menggunakan konsep biaya perolehan (historical cost), kecuali untuk akun-akun tertentu yang diukur berdasarkan basis lain seperti yang dijelaskan dalam kebijakan akuntansi terkait.

Dengan demikian, investor mengendalikan investee jika, dan hanya jika, investor memiliki seluruh hal berikut ini:

- a) kekuasaan atas investee:
- b) eksposur atau hak atas imbal hasil variabel dari keterlibatannya dengan *investee*; dan

#### 3. SIGNIFICANT ACCOUNTING POLICIES APPLIED

### a. Basis of Preparation of the Consolidated Financial Statements

The accounting policies applied in the preparation of these consolidated financial statements are consistent with the accounting policies applied in the preparation of the Group' consolidated financial statements for the year ended December 31, 2022.

The consolidated financial statements, except for the consolidated statements of cash flows, have been prepared on an accrual basis of accounting using the historical cost concept, except for certain accounts that are measured on the other bases as described in the related accounting policies.

The consolidated statements of cash flows are prepared using the direct method, and classified into operating, investing and financing activities.

The presentation currency used in the preparation of the consolidated financial statements is Rupiah (Rp), which is also the functional currency of the Company and Subsidiary.

### b. Principles of Consolidation

The consolidated financial statements incorporate all subsidiaries controlled by the Company. Control was obtained when the Company (investor) is exposed or has rights to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Therefore, the investor controls the investee if, and only if, it has all of the following:

- a) power over the investee:
- b) exposure or rights to variable returns from its involvement with the investee; and

# 3. IKHTISAR KEBIJAKAN AKUNTANSI PENTING YANG DITERAPKAN (Lanjutan)

 kemampuan untuk menggunakan kekuasaannya atas investee untuk mempengaruhi jumlah imbal hasil investor.

Konsolidasi atas *investee* dimulai sejak tanggal investor memperoleh pengendalian atas *investee* dan berakhir ketika investor kehilangan pengendalian atas *investee*.

Kepentingan nonpengendali mencerminkan bagian atas laba rugi dan aset neto yang tidak diatribusikan kepada entitas induk dan disajikan secara terpisah dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian dan ekuitas pada laporan posisi keuangan konsolidasian, dipisahkan dari ekuitas yang dapat diatribusikan kepada entitas induk.

Seluruh penghasilan komprehensif diatribusikan pada pemilik entitas induk dan pada kepentingan nonpengendali bahkan jika hal ini mengakibatkan kepentingan nonpengendali mempunyai saldo defisit.

Perubahan dalam bagian kepemilikan entitas induk pada entitas anak yang tidak mengakibatkan hilangnya pengendalian dicatat sebagai transaksi ekuitas, dimana jumlah tercatat kepentingan pengendali dan nonpengendali disesuaikan untuk mencerminkan perubahan bagian relatifnya atas entitas anak. Perbedaan antara jumlah kepentingan nonpengendali disesuaikan dan nilai wajar imbalan yang diberikan atau diterima diakui secara langsung dalam ekuitas dan diatribusikan pada pemilik entitas induk.

Seluruh saldo akun dan transaksi yang material antar entitas yang dikonsolidasi telah dieliminasi.

Jika entitas induk kehilangan pengendalian pada entitas anak, maka entitas induk:

a) menghentikan pengakuan aset (termasuk setiap *goodwill*) dan liabilitas entitas anak terdahulu dari laporan posisi keuangan konsolidasian.

c) the ability to use its power over the investee to affect the amount of the investor's returns.

Investee is consolidated from the date the investor obtains control of investee and continues to be consolidated until the date that such control ceases.

Non-controlling interest represents a portion of the profit or loss and net assets not attributable to the parent and is presented separately in the consolidated statements of profit or loss and other comprehensive income, and within equity in the consolidated statements of financial position, separately from equity attributable to the parent.

All other comprehensive income is attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Changes in a parent's ownership interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions, in which the carrying amount of the controlling and non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiary. The difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to the owners of the parent.

All significant intercompany transactions and balances have been eliminated.

If a parent loses control of a subsidiary, the parent:

a) derecognizes the assets (including goodwill) and liabilities of the former subsidiary from the consolidated statements of financial position.

# 3. IKHTISAR KEBIJAKAN AKUNTANSI PENTING YANG DITERAPKAN (Lanjutan)

- b) mengakui sisa investasi pada entitas anak terdahulu pada nilai wajarnya pada tanggal hilangnya pengendalian, dan selanjutnya mencatat sisa investasi tersebut dan setiap jumlah terutang oleh atau kepada entitas anak terdahulu. Nilai wajar tersebut dianggap sebagai nilai wajar pada saat pengakuan awal aset keuangan atau, jika sesuai, biaya perolehan pada saat pengakuan awal investasi pada entitas asosiasi.
- c) mengakui keuntungan atau kerugian terkait dengan hilangnya pengendalian yang dapat diatribusikan pada kepentingan pengendali terdahulu.

#### c. Kas

Kas terdiri dari saldo kas dan bank, dan tidak digunakan sebagai jaminan atau dibatasi penggunaannya.

#### d. Persediaan

Persediaan dinyatakan sebesar nilai yang lebih rendah antara biaya perolehan atau nilai realisasi neto (the lower of cost or net realizable value). Nilai realisasi neto adalah taksiran harga jual dalam kegiatan usaha normal dikurangi estimasi biaya penyelesaian dan taksiran biaya yang diperlukan untuk penjualan.

Komputer ekspedisi

Grup telah memilih untuk menggunakan model biaya sebagai kebijakan akuntansi pengukuran aset tetapnya. Penyusutan dihitung dengan metode garis lurus selama masa manfaat aset, kecuali untuk kendaraan truk yang dihitung dengan metode unit produksi mulai tanggal 1 Januari 2021. Taksiran masa manfaat aset tetap adalah sebagai berikut:

Taksiran Masa Manfaat/ **Estimated** Persentase/ **Useful Lives** Percentage Bangunan 5% 20 tahun/years **Buildings** Kendaraan 4 dan tahun/ 25% dan/and 12.5% Vehicles 4 and 8 years Peralatan dan perabotan kantor 4 tahun/years 25% Furniture and office equipmet Peralatan bengkel 25% 4 tahun/years Workshop equipment

4 tahun/years

Masa manfaat aset tetap dan metode depresiasi ditelaah dan disesuaikan, jika sesuai keadaan, pada setiap akhir periode pelaporan.

Tanah dinyatakan sebesar biaya perolehan dan tidak disusutkan. Grup menghitung penyusutan atas kendaraan truk dengan menggunakan metode unit produksi. Taksiran masa manfaat kendaraan truk berkisar 300.000 - 900.000 kilometer.

Beban perbaikan dan pemeliharaan dibebankan pada laba rugi pada saat teriadinya; biaya penggantian atau inspeksi yang signifikan dikapitalisasi pada saat terjadinya dan jika besar kemungkinan manfaat ekonomis di masa depan berkenaan dengan aset tersebut akan mengalir ke Grup, dan biaya perolehan aset dapat diukur secara andal. Aset tetap dihentikan pengakuannya pada saat dilepaskan atau ketika tidak ada manfaat ekonomis masa depan yang diharapkan dari penggunaan atau pelepasannya. Keuntungan atau kerugian yang timbul dari penghentian pengakuan aset dimasukkan dalam laba rugi pada periode aset tersebut dihentikan pengakuannya.

#### f. Fixed Assets

25%

The Group had chosen the cost model as the accounting policy for its fixed assets measurement. Depreciation is calculated on a straight-line method over the useful lives of the assets, except for trucks which are calculated using the units of production method starting January 1, 2021. Estimated useful lives of the assets are as follows:

The fixed assets' useful lives and methods of depreciation are reviewed, and adjusted if appropriate, at each end of reporting period.

Forwarding computer

Land is stated at cost and not depreciated. The Group calculates depreciation on trucks using the units of production method. The estimated useful life of a truck vehicle ranges from 300,000 - 900,000 kilometers.

The cost of repairs and maintenance is charged to profit or loss as incurred; replacement or major inspection costs are capitalized when incurred if it is probable that future economic benefits associated with the item will flow to the Group, and the cost of the item can be reliably measured. An item of fixed assets is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset is included in profit or loss in the period in which the asset is derecognized.

# 3. IKHTISAR KEBIJAKAN AKUNTANSI PENTING YANG DITERAPKAN (Lanjutan)

#### g. Penurunan Nilai Aset Nonkeuangan

Pada setiap akhir periode pelaporan, Grup menilai apakah terdapat indikasi aset mengalami penurunan nilai. Jika terdapat indikasi tersebut, maka Grup mengestimasi jumlah terpulihkan aset tersebut. Jumlah terpulihkan suatu aset atau unit penghasil kas adalah jumlah yang lebih tinggi antara nilai wajar dikurangi biaya pelepasan dan nilai pakainya. Jika jumlah terpulihkan suatu aset lebih kecil dari jumlah tercatatnya, maka jumlah tercatat aset tersebut diturunkan nilainya menjadi sebesar jumlah terpulihkan. Rugi penurunan nilai diakui segera dalam laba rugi.

Pembalikan rugi penurunan nilai untuk aset nonkeuangan selain *goodwill*, diakui jika, dan hanya jika, terdapat perubahan estimasi yang digunakan dalam menentukan jumlah terpulihkan aset sejak pengujian penurunan nilai terakhir diakui. Pembalikan rugi penurunan nilai tersebut diakui segera dalam laba rugi, kecuali aset disajikan pada jumlah revaluasian. Rugi penurunan nilai yang diakui atas *goodwill* tidak dibalik lagi.

## 3. SIGNIFICANT ACCOUNTING POLICIES APPLIED (Continued)

#### g. Impairment of Non-financial Assets

The Group evaluates at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, the Group estimates the recoverable amount of the asset. The recoverable amount of an asset or a cash-generating unit is the higher of its fair value less costs of disposal and its value in use. Whenever the carrying amount of an asset exceeds its recoverable amount, the asset is considered to be impaired and is written down to its recoverable amount. The impairment loss is recognized immediately in profit or loss.

Reversal on impairment loss for non-financial assets other than goodwill is recognized if, and only if, there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment test was carried out. Reversal on impairment losses is immediately recognized in profit or loss, except for assets presented using the revaluation model. Impairment losses relating to goodwill are not reversed.

Provisi atas kerugian penurunan nilai piutang usaha diukur dengan jumlah yang sama dengan kerugian kredit ekspektasian umurnya. sepanjang Kerugian ekspektasian sepanjang umurnya adalah kerugian kredit ekspektasian yang dihasilkan dari semua kemungkinan kejadian gagal bayar sepanjang umur yang diharapkan dari suatu instrumen keuangan.

Ketika menentukan apakah risiko kredit dari suatu aset keuangan telah meningkat secara signifikan sejak pengakuan awal dan ketika memperkirakan kerugian kredit ekspektasian, Grup mempertimbangkan informasi relevan yang wajar dan dapat dibuktikan dan tersedia tanpa biaya atau usaha yang tidak semestinya. Ini mencakup informasi dan analisis kuantitatif dan kualitatif, berdasarkan pengalaman historis Grup dan penilaian kredit dan termasuk informasi masa depan.

Grup menganggap aset keuangan gagal bayar ketika pelanggan tidak mampu membayar kewajiban kreditnya kepada Grup secara penuh. Periode maksimum yang dipertimbangkan ketika memperkirakan kerugian kredit ekspektasian adalah periode maksimum kontrak dimana Grup terekspos terhadap risiko kredit.

Kerugian kredit ekspektasian adalah perkiraan probabilitas-tertimbang dari kerugian kredit. ## 3. SIGNIFICANT ACCOUNTING POLICIES APPLIED (Continued)

The Group recognizes a provision for impairment losses for expected credit losses on financial assets measured at amortized cost. Provision for impairment losses on trade receivables is measured at an amount equal to the expected lifetime credit losses. Lifetime expected credit loss is the expected credit loss that results from all possible events of default over the expected life of a financial instrument.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating expected credit losses, the Group considers relevant information that is reasonable and demonstrable and available without undue cost or effort. It includes both quantitative and qualitative information and analysis, based on the Group's historical experience and credit assessment and includes future information.

The Group considers the financial assets to be default when the customer is unable to pay their credit obligations fully to the Group. The maximum period to consider when estimated expected credit losses is the maximum period of the contract in which the Group is exposed to credit risk.

Expected credit losses are probability-weighted estimates of credit losses. Credit losses are measured as the present value of all cash receipts deficiency (i.e, the difference between the cash flows payable from an entity under the contract and the cash flows that the Group expects to receive). Expected credit losses are discounted at the effective interest rate of the financial asset.

Keuntungan atau kerugian diakui dalam laba rugi ketika liabilitas keuangan tersebut dihentikan pengakuannya atau mengalami penurunan nilai, dan melalui proses amortisasi.

Grup mengeluarkan liabilitas keuangan dari laporan posisi keuangan konsolidasiannya jika, dan hanya jika, kewajiban yang ditetapkan dalam kontrak dilepaskan atau dibatalkan atau kedaluwarsa. Net interest expense or income, and service costs are recognized in profit or loss.

The Group recognizes past service cost as an expense at the earlier of when the amendments or curtailment of program occurs and when the entity recognizes related restructuring costs or severances. The Group recognizes gains or losses on the settlement of a defined benefit plan when such occur.

A curtailment occurs when the Group make a material reduction in the number of employees covered by a plan, or amends the terms of a defined benefit plan so that a significant element of future service by current employees will no longer qualify for benefits, or will qualify only for reduced benefits.

#### o. Leases

Leases that transfer substantially all the risks and benefits incidental to ownership of the leased item to the lessee are classified as finance leases. Finance leases are capitalized at the inception of the lease at the fair value of the leased assets or at the present value of the minimum lease payments if the present value is lower than the fair value.

# 3. IKHTISAR KEBIJAKAN AKUNTANSI PENTING YANG DITERAPKAN (Lanjutan)

Pembayaran sewa minimum dipisahkan antara bagian yang merupakan beban keuangan dan bagian yang merupakan pelunasan liabilitas sehingga menghasilkan suatu tingkat bunga periodik yang konstan atas saldo liabilitas. Beban keuangan dibebankan pada laba rugi. Aset sewaan yang dimiliki oleh penyewa dengan dasar sewa pembiayaan dicatat pada akun aset tetap dan disusutkan sepanjang masa manfaat dari aset sewaan tersebut atau periode masa sewa, mana yang lebih pendek, jika tidak ada kepastian yang memadai bahwa penyewa akan mendapatkan hak kepemilikan pada akhir masa sewa.

Dalam hal transaksi jual dan sewa-balik merupakan sewa pembiayaan maka transaksi tersebut harus diperlakukan sebagai dua transaksi yang terpisah yaitu transaksi penjualan dan transaksi sewa. Selisih lebih hasil penjualan dari jumlah tercatat ditangguhkan dan diamortisasi selama masa sewa.

Sewa yang tidak mengalihkan secara substansial seluruh risiko dan manfaat yang terkait dengan kepemilikan aset diklasifikasikan sebagai sewa operasi.

#### p. Provisi dan Kontinjensi

Grup menerapkan PSAK No. 57 "Provisi, Liabilitas Kontinjensi, dan Aset Kontinjensi". Provisi diakui jika Grup memiliki kewajiban kini (baik bersifat hukum maupun bersifat konstruktif) yang akibat peristiwa masa lalu, besar kemungkinannya penyelesaian kewajiban tersebut mengakibatkan arus keluar sumber daya yang mengandung manfaat ekonomi dan estimasi yang andal mengenai jumlah kewajiban tersebut dapat dibuat.

Provisi ditelaah pada setiap akhir periode pelaporan dan disesuaikan untuk mencerminkan estimasi terbaik yang paling kini. Jika arus keluar sumber daya untuk menyelesaikan kewajiban kemungkinan besar tidak terjadi, maka provisi dibatalkan.

## 3. SIGNIFICANT ACCOUNTING POLICIES APPLIED (Continued)

Lease payments are apportioned between finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recorded in profit or loss. Leased assets held by the lessee under finance leases are included in fixed assets and depreciated over the estimated useful life of the assets or the lease term, whichever is shorter, if there is no reasonable certainty that lessee will obtain ownership by the end of the lease term.

In the case of sale and leaseback results in a finance lease, this is to be treated as two separate transactions, i.e. sale and lease. The excess of sales proceeds over the carrying amount is deferred and amortized over the lease term.

Leases that do not transfer substantially all the risks and benefits incidental to ownership of the leased item are classified as operating leases.

#### p. Provisions and Contingencies

Provisions are recognized when the Group has a present obligation (legal or constructive) where, as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Provisions are reviewed at each end of reporting period and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed.

# 3. IKHTISAR KEBIJAKAN AKUNTANSI PENTING YANG DITERAPKAN (Lanjutan)

#### q. Informasi Segmen

Grup menerapkan PSAK No. 5 "Segmen Operasi". Grup mengungkapkan informasi yang memungkinkan pengguna laporan keuangan untuk mengevaluasi sifat dan dampak keuangan dari aktivitas bisnis dan menggunakan "pendekatan manajemen" dalam menyajikan informasi segmen menggunakan dasar yang sama seperti halnya pelaporan internal. Segmen operasi dilaporkan dengan cara yang konsisten dengan pelaporan internal yang disampaikan kepada pengambil keputusan operasional. Dalam hal ini pengambil keputusan strategis adalah Direksi.

#### r. Laba atau Rugi per Saham

Grup menerapkan PSAK No. 56 "Laba per Saham". Laba atau rugi per saham dasar dihitung dengan membagi laba atau rugi yang dapat diatribusikan kepada pemegang saham biasa entitas induk, dengan jumlah rata-rata tertimbang saham biasa yang beredar, dalam suatu periode.

### 4. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING

Penyusunan laporan keuangan konsolidasian, sesuai dengan Standar Akuntansi Keuangan di Indonesia, mewajibkan manajemen untuk membuat estimasi dan pertimbangan yang mempengaruhi jumlah-jumlah yang dilaporkan dalam laporan keuangan konsolidasian. Sehubungan dengan adanya ketidakpastian yang melekat dalam membuat estimasi, hasil sebenarnya yang dilaporkan di masa mendatang dapat berbeda dengan jumlah estimasi yang dibuat.

Grup mendasarkan estimasi dan pertimbangannya pada parameter yang tersedia pada saat laporan keuangan konsolidasian disusun. Situasi mengenai perkembangan masa depan mungkin berubah akibat perubahan pasar atau situasi diluar kendali Grup. Perubahan tersebut dicerminkan dalam pertimbangan terkait pada saat terjadinya.

#### q. Segment Information

The Group disclose information that enable users of the financial statements to evaluate the nature and financial effects of the business activities and use "management approach" under which segment information is presented on the same basis as that used for internal reporting purposes. Operating segment is reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker has been identified as the Board of Directors that makes strategic decisions.

#### r. Earnings per Share

Basic earnings per share are calculated by dividing profits attributable to ordinary equity holders of the Company, by the weighted average number of ordinary shares outstanding, during the period.

### 4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The preparation of consolidated financial statements, in conformity with Indonesian Financial Accounting Standards, requires management to make estimations and judgments that affect amounts reported therein. Due to the inherent uncertainty in making estimates, actual results reported in future periods may differ from those estimates.

The Group based its estimations and judgments on parameters available when the consolidated financial statements were prepared. Existing circumstances about future developments may change due to market changes or circumstances arising beyond the control of the Group. Such changes are reflected in the judgments as they occur.

# 4. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING (Lanjutan)

Estimasi dan pertimbangan berikut ini dibuat oleh manajemen dalam rangka penerapan kebijakan akuntansi Grup yang memiliki pengaruh paling signifikan atas jumlah yang diakui dalam laporan keuangan konsolidasian:

#### Menentukan mata uang fungsional

Faktor-faktor yang dipertimbangkan dalam menentukan mata uang fungsional Perusahaan dan Entitas Anak termasuk, antara lain, mata uang:

- a) yang paling mempengaruhi harga jual barang dan iasa.
- b) yang paling mempengaruhi biaya tenaga kerja, dan biaya lain dari pengadaan barang atau jasa, dan
- c) yang mana dana dari aktivitas pendanaan dihasilkan dan penerimaan dari aktivitas operasi pada umumnya ditahan.

Berdasarkan substansi ekonomis dari kondisi yang sesuai dengan Grup, mata uang fungsional telah ditentukan berupa Rp, karena hal ini berkaitan dengan fakta bahwa mayoritas bisnis Grup dipengaruhi oleh lingkungan ekonomi utama dimana Grup beroperasi, harga jual barang atau jasa dan biaya tenaga kerja, serta biaya lain dari pengadaan barang atau jasa dalam mata uang Rp.

#### Klasifikasi aset keuangan dan liabilitas keuangan

Grup menetapkan klasifikasi atas aset dan liabilitas tertentu sebagai aset keuangan dan liabilitas keuangan dengan mempertimbangkan apakah definisi yang ditetapkan PSAK No. 71 dipenuhi. Dengan demikian, aset keuangan dan liabilitas keuangan diakui sesuai dengan kebijakan akuntansi Grup seperti diungkapkan pada Catatan 3.

## 4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (Continued)

The following estimations and judgments made by management in the process of applying the Group' accounting policies have the most significant effects on the amounts recognized in the consolidated financial statements:

#### Determining functional currency

The factors considered in determining the functional currency of the Company and Subsidiary include, among others, the currency:

- a) that mainly influences sales prices for goods and services:
- b) that mainly influences labor, material and other costs of providing goods or services; and
- c) in which funds from financing activities are generated and receipts from operating activities are generally withheld.

Based on the economic substance of the underlying circumstances relevant to the Group, the functional currency has been determined to be Rp, as this reflects the fact that the majority of the Group' businesses were influenced by the primary economic environment in which the Group operates.

## <u>Determining classification of financial assets and financial liabilities</u>

The Group determined the classification of certain assets and liabilities as financial assets and financial liabilities by judging if they meet the definition set forth in PSAK No. 71. Accordingly, the financial assets and financial liabilities were accounted for in accordance with the Company's accounting policies as disclosed in Note 3.

# 4. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING (Lanjutan)

Menentukan nilai wajar dan perhitungan dari instrumen keuangan

Grup mencatat aset dan liabilitas keuangan tertentu pada nilai wajar melalui laba rugi dan pada biaya perolehan diamortisasi. yang mengharuskan penggunaan estimasi akuntansi. Sementara komponen signifikan atas pengukuran nilai wajar dan asumsi yang digunakan dalam perhitungan biaya perolehan diamortisasi ditentukan menggunakan bukti objektif yang dapat diverifikasi, jumlah nilai wajar atau amortisasi dapat berbeda jika Grup menggunakan metodologi penilaian atau asumsi yang berbeda. Perubahan tersebut dapat mempengaruhi secara langsung laba rugi Grup. Penjelasan lebih rinci diungkapkan dalam Catatan 30.

Menilai jumlah terpulihkan dari aset nonkeuangan

Penyisihan penurunan nilai pasar dan keusangan persediaan diestimasi berdasarkan fakta dan situasi yang tersedia, termasuk namun tidak terbatas kepada, kondisi fisik persediaan yang dimiliki, harga jual pasar, estimasi biaya penyelesaian dan estimasi biaya yang timbul untuk penjualan. Penyisihan dievaluasi kembali dan disesuaikan jika terdapat tambahan informasi yang memengaruhi jumlah yang diestimasi. Penjelasan lebih rinci diungkapkan dalam Catatan 7.

Jumlah terpulihkan aset tetap didasarkan pada estimasi dan asumsi khususnya mengenai prospek pasar dan arus kas terkait dengan aset. Estimasi arus kas masa depan mencakup perkiraan mengenai pendapatan masa depan. Setiap perubahan dalam estimasi ini mungkin memiliki dampak material terhadap pengukuran jumlah terpulihkan dan bisa mengakibatkan penyesuaian penyisihan penurunan nilai yang sudah dibukukan. Penjelasan lebih rinci diungkapkan dalam Catatan 10.

## 4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (Continued)

<u>Determining fair value and calculation of cost</u> amortization of financial instruments

The Group recorded certain financial assets and liabilities at fair values and at amortized costs, which require the use of accounting estimates. While significant components of fair value measurement and assumptions used in the calculation of cost amortization were determined using verifiable objective evidence, the fair value or amortization amount would differ if the Group utilized different valuation methodology or assumptions. Such changes would directly affect the Group' profit or loss. Further details are disclosed in Note 30.

## Assess the recoverable amount of the non-financial assets

Provision for decline in market value and inventory obsolescence was estimated based on available facts and circumstances, including but not limited to, the physical condition of the inventories held, market selling prices, estimated costs of completion and estimated costs incurred for sales. Provisions are re-evaluated and adjusted if there is additional information that affects the amount estimated. Further details are disclosed in Note 7.

The recoverable amount of fixed assets was based on estimates and assumptions specifically regarding the market prospects and cash flows associated with the assets. Estimates of future cash flows include estimates of future income. Any change in these estimates could have a material effect on the measurement of the recoverable amount and could result in an adjustment to the allowance for impairment already recorded. Further details are disclosed in Note 10.

# 4. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING (Lanjutan)

#### Penyisihan atas kerugian penurunan nilai piutang

Grup mengevaluasi akun piutang tertentu yang diketahui bahwa pelanggan tertentu tidak dapat memenuhi kewajiban keuangannya. Dalam hal tersebut. Grup menggunakan pertimbangan, berdasarkan fakta dan situasi yang tersedia, termasuk namun tidak terbatas pada, jangka waktu hubungan dengan pelanggan dan status kredit dari pelanggan berdasarkan catatan kredit dari pihak ketiga yang tersedia dan faktor pasar yang telah diketahui, untuk mencatat penyisihan spesifik atas pelanggan terhadap jumlah terutang guna mengurangi jumlah piutang yang diharapkan dapat diterima oleh Grup. Penyisihan spesifik ini dievaluasi kembali dan disesuaikan jika tambahan informasi yang diterima mempengaruhi iumlah penvisihan atas penurunan nilai piutang. Penjelasan lebih lanjut diungkapkan dalam Catatan 6.

# Menentukan metode penyusutan dan estimasi masa manfaat aset tetap

Biaya perolehan aset tetap disusutkan dengan menggunakan metode garis lurus berdasarkan estimasi masa manfaatnya. Manajemen mengestimasi masa manfaat aset tetap 4 tahun sampai dengan 20 tahun. Ini adalah ekspektasi umur yang secara umum diterapkan dalam industri dimana Grup menjalankan bisnisnya. Perubahan tingkat pemakaian dan perkembangan teknologi dapat mempengaruhi masa manfaat dan nilai sisa aset, dan karenanya beban penyusutan masa depan mungkin direvisi. Penjelasan lebih rinci diungkapkan dalam Catatan 10.

## 4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (Continued)

#### Allowance from impairment loss of receivables

The Group evaluates specific accounts receivable where it has information that certain customers were unable to meet their financial obligations. In these cases, the Group used judgment, based on available facts and circumstances, including but not limited to, the length of its relationship with the customer and the customer's current credit status based on any available third party credit reports and known market factors, to record specific provisions for customers against amounts due to reduce their receivable amounts that the Group expects to collect. These specific provision were re-evaluated and adjusted as additional information received affects the allowance for impairment of receivable. Further details are disclosed in Notes 6.

# <u>Determining the method of depreciation and the estimated useful lives of fixed assets</u>

The costs of fixed assets are depreciated on a straightline basis over their estimated useful lives. Management properly estimates the useful lives of these fixed assets to be within 4 years up to 20 years. These are common life expectancies applied in the industries in which the Group conducts its business. Changes in the expected level of usage and technological development could impact on the useful lives and the residual values of these assets, and therefore future depreciation charges could be revised. Further details are disclosed in Note 10.

# 4. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING (Lanjutan)

#### Estimasi beban dan liabilitas imbalan kerja

Penentuan liabilitas dan beban untuk imbalan kerja Grup tergantung pada pemilihan asumsi yang digunakan dalam menghitung jumlah tersebut. Asumsi tersebut termasuk antara lain tingkat diskonto, tingkat kenaikan gaji, tingkat pengunduran diri, tingkat kecacatan, umur pensiun dan tingkat mortalitas. Hasil aktual yang berbeda dari asumsi yang ditetapkan Grup langsung diakui dalam laba rugi pada saat terjadinya. Sementara Grup berkeyakinan bahwa asumsi tersebut adalah wajar dan sesuai, perbedaan signifikan pada hasil aktual atau perubahan signifikan dalam asumsi yang ditetapkan Grup dapat mempengaruhi secara material liabilitas dan beban imbalan kerja. Penjelasan lebih lanjut diungkapkan dalam Catatan 17.

### Menentukan pajak penghasilan

Pertimbangan signifikan dilakukan dalam menentukan provisi atas pajak penghasilan badan. Terdapat transaksi dan perhitungan tertentu yang penentuan pajak akhirnya tidak pasti sepanjang kegiatan usaha normal. Dalam situasi tertentu, Grup tidak dapat menentukan secara pasti jumlah liabilitas pajak mereka pada saat ini atau masa depan karena proses pemeriksaan oleh otoritas perpajakan. Grup mengakui liabilitas atas pajak penghasilan badan yang diharapkan berdasarkan estimasi apakah akan terdapat tambahan pajak penghasilan badan yang akan jatuh tempo. Penjelasan lebih rinci diungkapkan dalam Catatan 18.

Aset pajak tangguhan diakui apabila besar kemungkinannya bahwa laba kena pajak akan tersedia. Estimasi signifikan oleh manajemen disyaratkan dalam menentukan jumlah aset pajak tangguhan yang dapat diakui, berdasarkan saat penggunaan dan tingkat laba kena pajak dan strategi perencanaan pajak masa depan. Namun tidak terdapat kepastian bahwa Grup dapat menghasilkan laba kena pajak yang cukup untuk memungkinkan penggunaan sebagian atau keseluruhan dari aset pajak tangguhan tersebut. Penjelasan lebih rinci diungkapkan dalam Catatan 18.

## 4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (Continued)

#### Estimate of employee benefits expense and liability

The determination of the Group' liability and expense for employee benefits is dependent on its selection of certain assumptions used in calculating such amounts. These assumptions include among others, discount rate, salary increment rate, turnover rates, disability rate, normal pension age and mortality rate. Actual results that differ from the assumptions determined by the Group are immediately recognized in profit or loss as incurred. While the Group believed that its assumptions were reasonable and appropriate, significant differences in the Group' actual results or significant changes in the Group' assumptions may materially affect its employee benefits liability and expense. Further details are disclosed in Note 17.

#### Determining income taxes

Significant judgment is involved in determining provision for corporate income tax. There are certain transactions and computations for which the ultimate tax determination is uncertain during the ordinary course of business. The Group recognizes liabilities for expected corporate income tax based on estimates as to whether additional corporate income tax will be due. Further details are disclosed in Note 18.

Deferred tax assets are recognized to the extent that it is probable that taxable profit will be available. Significant estimation by management is required in determining the amount of deferred tax assets that can be recognized, based on the timing and level of taxable income and future tax planning strategies. However, there is no certainty that the Group will generate sufficient taxable income to allow all or part of the deferred tax assets to be utilized. Further details are disclosed in Note 18.
